## EDUCATION

Vellore Institute of Technology, Bhopal

2023 – 2027

B.Tech in Computer Science and Engineering — **CGPA : 8.67**

Bhopal, Madhya Pradesh

## TECHNICAL SKILLS

**Languages:** Python, C++, JavaScript, SQL

**Frameworks:** FastAPI, Flask, Streamlit, Node.js, Express.js, REST APIs

**AI/ML:** Machine Learning, Deep Learning, Generative AI, LLMs, RAG, NLP, Scikit-Learn, PyTorch

**Databases:** MongoDB, PostgreSQL, SQLite, Redis

**Tools/Cloud:** Git, GitHub, Postman, VS Code, Linux, Azure, OCI

**Coursework:** DSA, OOP, DBMS, OS, Computer Networks

## PROJECTS

AI Proposal Evaluation System (R&D) | Python, FastAPI, Scikit-Learn, SHAP, Generative AI

- **Built a full-stack AI proposal evaluation platform using FastAPI** (backend) and **Streamlit** (frontend), implementing **REST APIs** for PDF processing, automated proposal evaluation, AI-assisted report generation, and evaluation history management.
- Designed a **modular AI evaluation pipeline** integrating document parsing, novelty analysis, financial validation, machine learning scoring, uncertainty estimation, and explainable AI, achieving **91.3% prediction accuracy**.
- Integrated **Generative AI**, SHAP-based explainability, SQLite storage, and automated PDF report generation to deliver transparent proposal evaluations with downloadable reports in under **5 seconds**.

Smart Storage Optimization System | Python, Flask, ML, Pandas, SQLite

- **Built a full-stack Smart Storage Health Monitor** using **Flask** (backend) and **HTML, CSS, and JavaScript** (frontend), implementing **4+ storage management modules** including health monitoring, duplicate detection, junk cleaning, and optimization.
- Developed modular backend services and **REST APIs** capable of scanning **10,000+ files**, identifying duplicate and junk files, and automating storage analysis through an interactive dashboard.
- Implemented responsive dashboards with **Chart.js** visualizations, reducing storage analysis response time from **3s to 1.5s** and improving storage utilization by up to **30%**.

Safe.AI | HTML, CSS, JS, Redis, MongoDB, AI Moderation APIs

- Developed a real-time AI moderation engine capable of **analyzing 10,000+ content samples** (text + images) for toxicity and unsafe content.
- **Achieved 95%+ detection accuracy** using integrated Bytez.js and Sightengine APIs for multi-modal moderation.
- **Reduced moderation latency by 35%** using Redis-based asynchronous processing, while designing scalable MongoDB storage for **50,000+ moderation logs**.

## CERTIFICATIONS

- **Generative AI Using IBM Watsonx (IBM)**
- **Oracle Cloud Infrastructure 2025 Certified Data Science Professional**
- **Microsoft Azure Data Fundamentals (DP-900)**

## ACHIEVEMENTS

- **Machine Learning Lead**, Google Developers Group Club (GDGC) Oct 2025 – Sep 2026.
- **SIH (Finalist)** in Internal-round of SIH Hackathon 2025 (Top 45 out of 950 teams)
- **2nd Runner-up**, CyberShield Hackathon (WiCys Club)
